COMPANY OVERVIEW

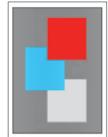

As an indigenous construction company, we are committed to delivering exceptional civil engineering and building services across Nigeria. We specialize in the construction of skillfully designed and meticulously built industrial structures, including power plants, factories, warehouses, and water and sewage treatment facilities. Our portfolio also extends to public hospitals and various public utility buildings.

Over the years, we have established ourselves as a leading player in the construction industry by successfully executing a wide range of commercial projects, such as office complexes, hotels, sports facilities, roads, shopping malls, government buildings, and administrative centers..

In addition, we have a strong track record in delivering precision-engineered residential housing projects, including government-funded residential estates, and housing developments for individuals and private companies.

In support of our construction services, we also offer integrated cement logistics and distribution solutions, managing the sourcing, transportation, and timely delivery of cement to project sites. We also hold longstanding distributorship partnerships with industry leaders such as Dangote and Lafarge (Unicem), efficiently supplying wholesalers, retailers, construction sites and block industries. This ensures our clients receive the highest quality materials exactly when needed, enabling the success of every project.

VISION & MISSION

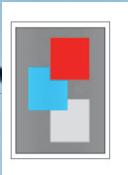

Vision

“To be a world-class construction company, delivering innovative and cost-effective solutions that meet international standards. We are dedicated to providing value-driven services, ensuring client satisfaction, and upholding the highest standards of safety and environmental performance”

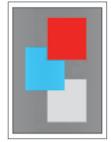

Mission

“To create sustainable, high-quality construction solutions that stand the test of time and improve the lives of the communities we serve”
